Mit dem Wohnmobil ins Winterwunderland

 8. Januar 2025 in der Schweiz · 🌨 3 °C

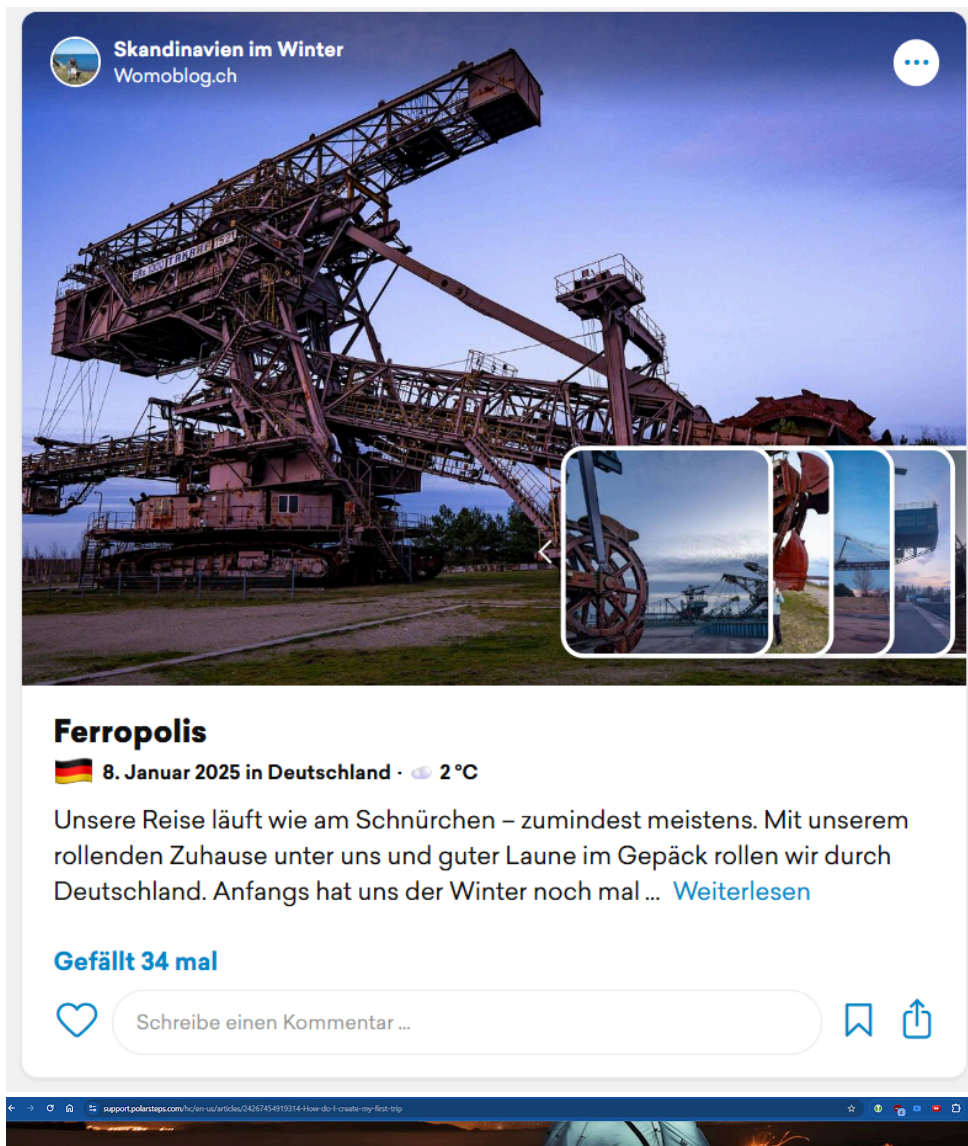

Endlich ist es soweit – unser lang ersehntes Abenteuer beginnt! Voller Vorfreude und mit allem, was wir brauchen, starten wir mit unserem Wohnmobil von Sevelen aus. Der Regen begleitet uns, doch das ...

How to create a new trip

Mobile App

In the top right corner of the app, there is a **sign**. Just tap on it and you are good to go!

What are Trip Reels?

Trip Reels are exciting short videos to look back on your trip! They are automatically created when you open your trip and tap the "Play" button on the trip page  or in the trip menu. You can watch the Trip Reels right away and then share the video with your friends on apps like Tiktok, Instagram or Whatsapp, or download it to your device. Please note that some other apps compress the video file, so downloading it to your device guarantees the best resolution.

Can I import my photos? (e.g. iCloud, Google Photos)

When you are adding photos to the steps in your current or past trips, you can upload photos that are stored on your device. If you are using our iOS or Android app, you can import photos directly from cloud storage services.

iPhone app

You can manually add photos from any album available in your Photos app besides your regular Camera Roll. This would include iCloud or other any other app that creates an album in the Photos app (e.g. Instagram).

Android app

You can import photos from anywhere on your device, including most cloud services such as Google Photos or Dropbox.
